DETAILED ACTION

Response to Amendment

1. The reply filed 18 March 2002 was applied to the following effect:
 - All relevant objections and rejections are withdrawn as being satisfied.

Reasons for Allowance

2. Claims 3-6 and 9-14 are allowed, renumbered as 1-10, respectively.

The following is an examiner's statement of reasons for allowance:

This application is for a mechanism for preventing propagation of driving motor noise and vibration on a tape deck, and tape deck having the same.

- Claim 4 specifies that the direct driving motor including a rotational axis as a capstan axis, a rotor which is mounted on the rotational axis, a stator core which is wound by a coil being supplied PWM (pulse width modulation) control current and faces to said rotational rotor, and a bearing holder which holds said stator core and supports said rotational axis, and said direct driving motor is mounted through said bearing holder on the deck chassis; wherein said bearing holder is made of an insulation material.
- Claim 9 specifies the motor PCB (printed circuit board) is held in close to where the bearing holder is mounted on the deck chassis, and supported by a supporting member in an electrically insulating state at a distance from where the motor PCB is held.

These features are not anticipated by, nor made obvious over, the prior art of record.

Art Unit: 2653

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
